

Corona Antigen Rapid Test

FAQ:

Why do you need a Corona Antigen Rapid Test before the Check-up?

- The Medbase Group has made the decision to require a negative Corona Rapid Test before a check-up and/or performance diagnostic test to insure the health of its patients and employees

Where can you receive a Rapid Test and how long does it take?

- The Rapid Test can be made on arrival at the Medbase Checkup Center, results are possible as soon as 15 minutes

What happens if the test is positive?

- By a positive test result we cannot proceed with the check-up or a performance diagnostic test

What do I need to do after a positive test result?

- You must go into Quarantine. You must also take a PCR Test to verify the Rapid Test result, which we can organise for you at Permanence at the main train station in Zürich

Will there be additional costs for me?

- No, the cost of the Rapid Test will be paid for by the Medbase Checkup Center. If it is required to receive an additional PCR test, that will be paid for by the BAG
